Directions: Ask students to trace the dotted lines, starting at the stars. Students may color the pictures (optional).
Dear Family Member,

In class, we have been practicing diagonal lines. Knowing how to draw a diagonal line is important because diagonal lines are found in a number of letters (e.g., ‘k’, ‘v’, ‘x’, etc.). Please have your child trace the dotted diagonal lines on the front and back of this worksheet, starting at the small stars on top of each larger star. Your child may color the page.
