

A **character web** maps the connections and relationships between characters in a novel.

**START** by making a list with the main character's name at the top and 4-6 other characters from the book below.

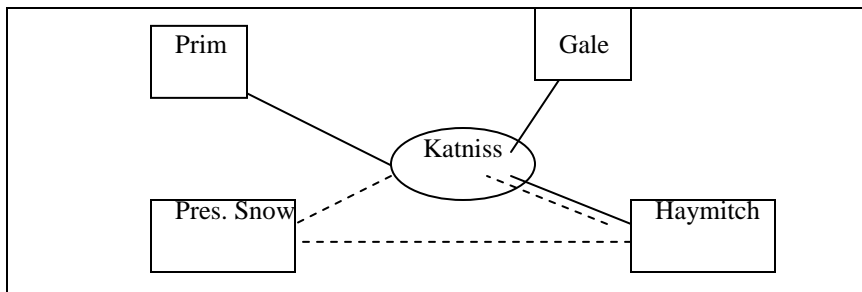

**Example** from *The Hunger Games*

Main character: Katniss  
Other characters: Prim  
                          President Snow  
                          Haymitch  
                          Peeta

**NEXT**, write the main character's name in the middle of the page and circle it.

**THEN**, write the other character from your list. Draw a line from the main character to each secondary character. The line should be solid if there is a positive relationship and be dashed/dotted if it's a negative relationship. Along the line, explain what that relationship is.

**LAST**, Draw a line between any of the peripheral (side) characters if any of them have relationships. In this case, Haymitch hates President Snow, so there is a dotted line between them.
