

IRM OBJECTIVES, Grades 5 - 8

The fifth through eighth grade objectives are in a different format than the lower grades. Some of the schools in the Diocese of Charleston spiral the science objectives through the middle school grades. Other schools are K-6th grade and do not include 7th and 8th in their schools. As a committee, we decided to separate the objectives into physical, earth, and life science for grades 5th- 8th. The teaching sequence of these objectives will be decided by the individual schools. However, those schools that only teach through 6th grade, should focus on those objectives labeled as 5th and 6th grade. These objectives should be taught before students leave these schools.
