

Section 3: Direct Variation and Graphing Linear Functions Goals and Objectives

At the end of this section student should be able to,

- ❑ Identify direct variation.
- ❑ Graph direct variation equations.
- ❑ Solve real-world problems using direct variation models.
- ❑ Recognize and use function notation.
- ❑ Graph a linear function.
- ❑ Change slope and intercepts of function graphs.
- ❑ Analyze graphs of real-world functions.
