

# **Section 1: Solving Simple Equations**

## **Goals and Objectives**

At the end of this section student should be able to,

- ❑ Solve an equation using addition.
- ❑ Solve an equation using subtraction.
- ❑ Solve an equation using multiplication.
- ❑ Solve an equation using division.
- ❑ Solve a two-step equation using addition, subtraction, multiplication, and division.
- ❑ Solve a two-step equation by combining like terms.
- ❑ Solve real-world problems using two-step equations.
