

Section 2: Solving Complex Equations

Goals and Objectives

At the end of this section student should be able to,

- ❑ Solve a multi-step equation by combining like terms.
- ❑ Solve a multi-step equation using the distributive property.
- ❑ Solve real-world problems using multi-step equations.
- ❑ Solve an equation with variables on both sides.
- ❑ Solve an equation with grouping symbols.
- ❑ Solve real-world problems using equations with variables on both sides.
