

Solve the equations below and write the algebraic steps. The first one is done for you.

$n + 2 = 12$

$n + 2 - 2 = 12 - 2$

$n = 10$

$n + 8 = 14$

$n - 7 = 12$

$n - 15 = 33$

$n + 12 = 38$

$a - 14 = 12$

$b + 14 = 14$

$x - 23 = 87$

$n + 15 = 128$

$x + 25 = 40$

$x - 28 = 96$

$a - 42 = 22$
