

The Stone Age and Early Cultures

Review

At the end of this unit, students will be able to:

- What is the relationship between hominids and early humans? What does *homo sapiens* mean?
- What was daily life during the Stone Age like? What is the meaning of “Paleolithic”?
- What were the lives of hunter-gatherer societies like? Are there still hunter-gatherer societies like?
- How did global climate change, such as the Ice Age, affect human migration?
- How did humans create new tools to adapt to their new environments?
- What does “Neolithic” mean? How was the Neolithic Era different than the Paleolithic Era?
- How did humans first discover agriculture?
